

Arthritis SA Health Professional Conference 2017

Learning outcomes:

- Implement current evidence for conservative and surgical management of gout
- Discuss new concepts in chronic pain management techniques, including pharmacological options for patients with arthritis so as to enhance patient safety
- Recognise and appropriately investigate common presentations of joint pain in children and adolescents
- Discuss and review evidence related to the diagnosis and ongoing management of fibromyalgia in general practice
- Identify the use of biosimilar medicines in the treatment of patients with inflammatory arthritis
- Describe the benefits and risks of arthroscopic knee surgery for patients with knee pain and degenerative knee disease
